

Electrodes holder sight glass SNS® tee f/t

SNS
Netvitc System®

From Ø50 to Ø90

► PN 6

NETVITC SYSTEM® PRESSURE FITTINGS

The **electrodes holder sight glass SNS® tee f/t**, is specifically designed for swimming pool installations and **salt chlorination systems**. Its threaded ports allow easy installation of probe fittings, while the transparent sight glass body enables visual monitoring of the fluid flow

■ The **electrodes holder sight glass SNS® tee f/t** is a product that adapts perfectly to the swimming-pool world, especially for salt electrolysis systems, providing a unique solution, besides modularity and ease of installation.

The threaded connections allow you to fit any sensor-holder, its **sight glass body** ensures the perfect fit of sensors and its **connection by means of SNS®** provides multiple connection possibilities as well as easy disassembly.

- From Ø50 to Ø90 with three 1/2" threaded connections. ■ From Ø50 to Ø75 with two 1/2" side connections and one central 3/4" connection.
- The transparent sight body allows easy probe installation and visual inspection. ■ Designed to accommodate standard probe holders. ■ The sight body allows easy probe installation and visual inspection. ■ Multiple probes integrated into a single unit. ■ PN 6.

UNIQUE
on the market

For a complete and efficient management of pool maintenance, we recommend the choice of the **injection check valve** and the **probe connection**.

- > Probe connection 1/2" and 3/4"
- > Injection check valve from 3/8" - 6x4 to 1/2" - 12 mm

■ The image shows the complete scheme of a pool filtration and disinfection system.

The inclusion of the **Electrodes holder sight glass SNS® tee f/t**, along with the products in our range of fittings and valves, forms an integral solution for hydraulic installations in all filtering systems.
